

ABSTRACT OF THE DISCLOSURE

An AV communication control circuit suitable for a
radio LAN-LSI in a radio AV transmission/reception
5 device is formed by a copyright protection processing
unit configured to carry out a copyright protection
processing with respect to AV data entered from an AV
stream signal line, a selection unit configured to
select either one of AV data entered from an AV stream
10 signal line and AV data entered from a general purpose
bus, and a transmission control unit configured to
carry out control for transmitting AV data selected by
the selection unit to a network.
